

2021-2022 Fifth Grade Supply List

Science - 1 subject wide ruled notebook, 1 double pocket folder.

Social Studies - 1 subject wide ruled notebook

ELA - 2 subject wide ruled notebook, two pocket folders (one for reading and one for writing)

Math with Lunde - 1 1/2 inch binder, 1 notebook, 3 whiteboard markers/1 eraser, 1 pocket folder

SAGE Math with Mead- 1 inch binder, 3-5 subject notebook, dry erase marker, pocket folder

Community supply for SAGE room- clorox wipes

Supplies to keep in backpack - sharpened pencils, colored pencils, markers, small pencil sharpener, glue sticks, scissors

Community supplies for classroom- Clorox wipes, hand sanitizer, glue sticks, pencils, tissues, paper towels

Dear Future Fifth Grade Student,

We would like to take this opportunity to introduce ourselves and welcome you to fifth grade!

In Mrs. Lunde's math class, you will learn place value from thousandths to millions, all four operations as related to whole numbers, decimals, and fractions (including the order of operations), the equivalence of fractions and decimals, strategies for calculating volume and area, classifying shapes for geometry preparation, and plotting/reading points on a coordinate plane. In each of our six modules, we will apply mathematics to solving problems in our daily lives. The most important thing to know for 5th grade math is your multiplication facts to 12. Start studying them today if you don't have them memorized!

In Mrs. Matej's' ELA class, you will be reading both fiction and nonfiction text. You will learn more about story elements, theme, cause and effect, sequence, how to understand what is inferred in text, and much more. Strong development in reading is essential to success in school. Each month you will create a book report from a variety of genres. We will also be learning how to effectively write all different types of essays, so get your pencils sharpened and ready to go!

In Mrs. Pope-Turner's science class you will be using the scientific method to explore and carry out various investigations. You will be learning that matter of any type can be subdivided into particles too small to see and, in a closed system, if properties change or chemical reactions occur, the amount of matter stays the same. We will study forces and motion and how objects can affect other objects even when they are not touching (gravity). Our class will also study genetic information that is passed from one generation to the next in plants, animals and humans. We will also explore how natural and human-caused changes to habitats or climate can impact populations.

In Mrs. Reichard's social studies class, you will be learning about our great country, starting with the thirteen colonies and covering all the way through the Civil War. We will also be improving our geography skills, researching current events, learning to evaluate primary sources, and looking in depth at our system of government.

We are looking forward to meeting you and spending an exciting year of learning together! Have a safe and happy summer!

Your Fifth Grade Teachers,

Mrs. Lunde, Mrs. Matej, Mrs. Pope-Turner, and Mrs. Reichard
