****Arizona law requires that public schools provide supplies required for academic success. Teachers may request optional, supplementary items, which you may supply at your discretion. If you have any questions, please feel free to contact the school office.**

Stetson Hills 8th Grade Welcomes You!

Dear Parents and Students,

We would like to take this opportunity to introduce ourselves and welcome you to 8th grade at Stetson Hills. We are so excited to learn with your children and have a great year!

Mrs. Smith will be teaching 8th grade Social Studies, _____ will be teaching 8th grade Math, Ms. Grasso will be teaching 8th grade Language Arts, Mrs. Burdzy will be teaching 8th Grade Science, and, Mrs. O'Leary will be teaching Algebra! We can't wait to make this year a great end to your child's "Stetson Career"!

We will be hosting a virtual curriculum night in the beginning of the school year to give you specific details about the year ahead. Below are some key points we would like to share!

Math (8th Grade)

This will be _____ first year teaching at Stetson Hills school. I am excited to announce that we will be using a new mag resource this year, Illustrative Math. This resource is very hands on and allows students to use technology in order to increase their understanding of concepts. Students will still need to have a binder with them, and materials will be provided for each module.

Social Studies

This will be Mrs. Smith's (formerly Ms. Shirk) sixth year teaching Social Studies at Stetson Hills. In her class, we'll be learning about the beginnings of our country and how we fought to become the United States of America. We'll also take a look at one of the most amazing documents of our country: the Constitution. Next we skip ahead to World War II; both in Europe and the Pacific. We'll continue on through history until reaching modern day America

Language Arts

This will be Ms. Grasso's fifth year teaching Language Arts at Stetson Hills. This year in Language Arts we will kick the year off by working out of our Collections textbook with a collection called Culture and Belonging. Students will work together to discover what it means to develop your identity within a new culture. Moving on from there, students will challenge their personal biases as we go through our *The Outsiders* literature study.

Science

This will be Mrs. Burdzy's first year teaching 8th Grade Science at Stetson Hills. This is a project-based learning classroom where we will be diving hands-on into biology, chemistry, physics, and the human impact on the planet by investigating with the scientific method.

Math (Algebra)

This will be Mrs. O'Leary's first year teaching Algebra and Advanced 8th Grade Math at Stetson Hills.

We are excited for what will be a great year!
