

Showing Divide by 10

2 thousands $\div 10$ is 200

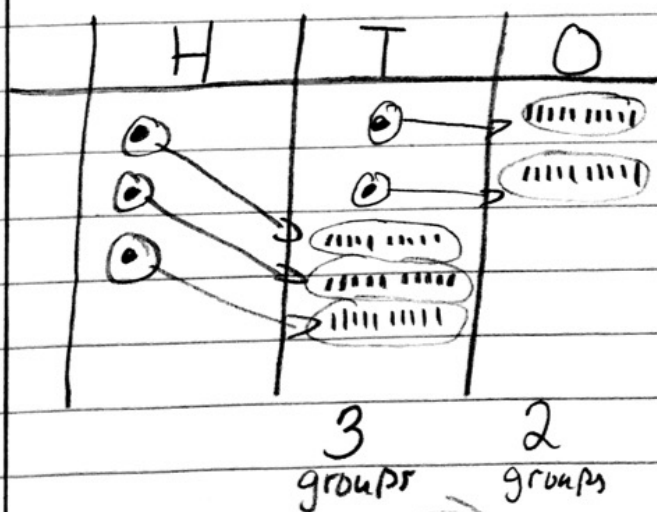

Strategy - use a place value chart
Start here

take each 1000 disk and divide them into 10 by moving the 1000 disk to the 100 column.

We have 2 equal groups of 100 which is 200.

$$320 \div 10 = \underline{32}$$

divide each dot into 10 by moving one place to the right and dividing it into 10.

32
