

The JET Program

JET is a program that started out as June Extended Teaching where students had an opportunity during the summer to complete the previous semester's work in Math or English to earn the credit. With great success, we have expanded the program to the school year. The JET name stays and we consider it Just Extended Teaching. Students who attended JET earned credit 88% of the time in ELA and 90% of the time in Math. These students then have more than an 80% record of passing the next year's ELA and Math class as well. Teachers of JET focus on the essential learning each student must have in order to become proficient in the class and future classes. JET is for select students during the summer.
