

Modernization message

Greetings Falcons this is Matt Hreha, Principal of Hillcrest Middle School with an important announcement:

Falcon parents, as many of you may or may not know, Hillcrest has been chosen to be modernized this Spring, Summer and Fall. This is an exciting time in which our classrooms will be renovated, a new STEM lab created, the office and parking lots will be reconfigured and our nurses office will be relocated, just name a few of the changes that will be happening to campus. In order for this process to be slated to be completed by early fall, the construction company will begin construction during spring break of this year. With that said there will be some major changes that will take place right before and after spring break. Students who have Mrs. Kuntz, Mrs. Olson, Mrs. Mokogwu, Mr. Brooks, Mrs. Johnson, Mrs. Kenobbie, Miss Krull, Mrs. Marcus and Mrs. Barnes will be relocated to other classrooms on our campus. 8th grade students that have Mrs. Rzemien, Mrs. Solano, Mr. Root, Mr. Stephens, Mrs. Christensen or Mrs. Jennewine will be relocated to the portable buildings, which are located just southeast of the main Hillcrest Building, just prior to spring break. The construction company has spent the last 2 weeks repairing the portable buildings and making them a safe learning environment. The final major change will be in our main parking lot. After spring break the far south lane of our parking lot will be closed to traffic and parking. The contractors and subcontractors will be using that as a staging area. All traffic will be rerouted to the center lane for student drop off and pick up. To help with traffic we will be having our resource officers come in at 7:55 am to direct vehicles out of the parking lot. All of this information will also be put on our website. We thank you for your patience during this time and also for your continued support.
