Example Practice Log:

What do I intend on improving in my music (specific goals, not just measure numbers or exercises)?

I have difficulty going over the break to get to B natural in measure 5 of my piece. I also cant get it in my concert Bb scale. I want to be able to slur to the note without a "bump" in the sound!

Did I accomplish my goals: Yes / No How long did I practice: 15 min

How did I practice well? OR What do I still need to work on?

I did a good job by slowing down the tempo and working just on the change from A to B natural... not trying to get the hole thing at once by breaking it down into a smaller part. But I can only get it smooth with the metronome at 84. My goal for tomorrow is to get it smooth at 100 bpm.
